HOT DOGS

What better way to pamper a canine companion than with this selection of luxe accessories?

LIVING THE DREAM

Your dog may not realise it, but buckling this natty brown leather 'New York' collar to its neck, by **Bellomania**, will instantly make him stand out among his peers.

REST EASY

Renowned for top human fashion, Italy is also home to some impressive designs for pets. The Carbon Wave pet bed from **b.pet** is made from lightweight carbon fibre and has an eye-catching patterned cushion to ensure your dog can rest in style.

WHERE FOR ART THOU?

The perfect companion bowl set for star-crossed canine lovers, Romeo and Julia from **Bellomania** are made from ceramic and finished with a decorative platinum or gold bone-shaped grip.

IN THE BAG

The Baxter pet carrier has the classic **Louis Vuitton** design on the outside and a quilted rug on the inside, so your dog can travel both fashionably and comfortably. Dog not included.

COOL CATS

Why should dogs have all the fun? Cats can be spoilt too ...

DINNER IS SERVED The sleek contemporary design of the Fat Cat food dish, from **Wetnoz**, means famished felines can look the part as they tuck in at mealtimes.

SETTLING DOWN

The Kittypod from US designer **Elizabeth Paige Smith** is made from predominantly recycled materials, meaning eco-conscious kitties can rest easily. The durable design also makes it a suitable scratching post.

CARRY ME HOME

Comfortable, safe and easy to carry, the **Sleepypod** should satisfy cat and owner alike while on the move. And when the destination has been reached, the top can be removed to make a cosy conventional pet bed.

MAKING THE BREAKTHROUGH

Being the independent animals that they are, cats often like to come and go as they please. This wittily designed cat flap from Dutch designer **Marly Gommans** will allow them to do just that, bursting through the door every time they come in.
