Sleepypod Air

Categories: pet carrier, pet travel bed

FIRST CLASS LEGROOM ON EVERY FLIGHT: Sleepypod Air's innovative design enables it to contract in size to fit in the space below a range of airline seats during the restricted times of takeoff and landing; once the plane is in the air, [Sleepypod Air](#) can be expanded to allow a pet the largest possible space below an airline seat. For added versatility, seatbelt straps on two sides transform Sleepypod Air into a safe car seat. Removable and machine-washable Ultra Plush bedding ensures a comfy pet bed away from home.

Other significant features include a secure and durable mesh panel positioned on three sides for better ventilation, removable privacy panel, and top and side entries for easy access. In addition, Sleepypod Air is designed to fold flat for easy storage. Its sturdy, easy-clean exterior is made of luggage-grade, ballistic nylon. A trolley pocket to secure Sleepypod Air onto luggage, large zipper pockets on two sides for essential pet items, adjustable shoulder straps with comfort padding, a padded carry handle, safety tether, and ergonomic zipper pulls are additional features. Sleepypod Air can be augmented with a plug-in Warmer pad accessory that slips below the standard Ultra Plush bedding to help keep a pet warm in cooler climates.

Sleepypod Air was crash tested at the standard set for child safety restraints. It is proven to be one of the safest carriers in an auto collision. Watch the crash test at:
