Sleepypod, New Pet Bed/Travel Carrier, Reduces Stress Of Traveling With Pets

(Los Angeles, CA, Sept 18, 2007) Increasing numbers of travelers wish to have their pet with them to maximize the pleasure of the vacation. Around 62 million people in America own dogs and 29 million of them take their dogs with them when they go traveling. Most cats and dogs associate travel with negative experiences, such as to the vet or kennel, causing undue stress and anxiety for pet and caregiver alike. The Sleepypod alleviates this problem by offering the most complete bedding system on the market, changing the way small dogs and cats live and travel.

The award winning Sleepypod is more than just a bed, it's a lifestyle built to fit a pet's individual needs. At home or on the go, Sleepypod features an ultra plush bedding, a foam interior, and an optional heating pad, designed to pamper the pet in his/her personal living space every day.

Pets need to feel safe and secure; something that doesn't happen when being forced into a confined space. The Sleepypod, with its patented adjustable dome top, easily accommodates the cat who likes his privacy as well as the dog who needs to be aware of her surroundings at all times. As the Sleepypod becomes a familiar and trusted part of the pet's life, traveling will become much easier and less stressful for everyone. To safely transport your pet in the car, simply wrap the seat belt around the base of the Sleepypod, buckle it in, and pull the shoulder belt through the top handle.

Additional Features:

- Removable Padded Shoulder Strap
- Removable Mesh Dome Top with Carrying Handle
- Machine Washable Replaceable Ultra Plush Bedding
- Low Power 102°F Warmer
- 6.5W 100-240v 50/60Hz
- UL Listed USA Plugs; International Adapters Now Available
