Sleepypod is First Pet Product Manufacturer to Crash Test at U.S., Canadian, and European Child Safety Restraint Systems Standards

With new round of crash testing on its entire line of pet safety restraints, all Sleepypod safety harnesses and carriers are tested at U.S., Canadian, and European child safety restraint systems standards.

Pasadena, Calif.—May 2, 2018—Sleepypod®, a Pasadena-based company known for redefining pet products, today announces its entire line of pet safety restraints for cars has been crash tested at U.S., Canadian, and European child safety restraint systems standards.

“Sleepypod is the first pet product manufacturer to test its pet safety restraints for cars at U.S., Canadian, and European child restraint systems standards with successful results,” says Michael Leung, Sleepypod co-founder and lead product designer. “In each test, Sleepypod’s safety harnesses and carriers kept a crash test pet from accelerating forward and leaving the test bench while mitigating damaging forces and limiting rotation.”

Sleepypod carriers and safety harnesses include Pet Passenger Restraint System (PPRS) components designed by Sleepypod to secure a pet in a vehicle and restrict harmful movement during a sudden vehicle stop or frontal collision. Watch the crash tests on Sleepypod’s video channel at YouTube.com/Sleepypod.

Clickit Terrain and Clickit Sport safety harnesses were crash tested using DUKE 2.0, Sleepypod’s proprietary crash test dog weighing 75 pounds. Find more information about DUKE 2.0 at https://www.youtube.com/watch?v=Nb210V0_on8.

The Sleepypod, Sleepypod Air, and Sleepypod Atom pet carriers were crash tested using Sleepypod’s crash test cat, CLEO 2.0. The Sleepypod Mini carrier was crash-tested using Sleepypod’s smallest crash test dog, MAX Mini.
About Sleepypod
Look behind the beautiful designs and you’ll find multiple functions, durable materials, and safety beyond compare. Sleepypod pet products have earned numerous awards and accolades for safety and design innovation.
