New Pet Seat Belt Crash Tested at U.S. and Canadian Safety Standards for Child Restraint Systems

“Sleepypod is the first pet product manufacturer to test its pet seat belts at U.S. and Canadian safety standards for child restraint systems with successful results,” says Michael Leung, Sleepypod co-founder and lead product designer. “In each test, the Clickit Terrain safety harness kept the crash test dog from accelerating forward and leaving the test bench while controlling rotation.” Watch the crash tests at https://www.youtube.com/watch?v=wyXWASEZWXs.

Sleepypod tested the Clickit Terrain safety harness using DUKE 2.0, Sleepypod’s proprietary crash test dog weighing 75 pounds. Find more information about DUKE 2.0 at https://www.youtube.com/watch?v=Nb210V0_on8.

About Clickit Terrain
Clickit Terrain is light and easy to use without sacrificing safety. Shock absorbing sleeves work with a broad padded vest and patented Infinity Loop design for more safety in the car. The same patent pending shock absorbing sleeves make Clickit Terrain comfortable for use as an everyday walking harness and also provide better control for the handler. Reflective patches on the harness shoulders can be interchanged with service patches for working dogs. Clickit Terrain can be used with an optional Terrain Pack. Working dogs and active dogs will benefit from the Clickit Terrain design. It combines award-winning travel safety technology with
