Sleepypod® Presents Sleepypod Atom
A Modern Pet Carrier with Innovative Design Features for Everyday Living

Pasadena, Calif.—March 16, 2011—Sleepypod®, a Pasadena-based company recognized for redefining pet products, today announces that it will present its newest evolution in pet carriers, Sleepypod Atom, at the Global Pet Expo 2011 in Orlando, Fla. on March 16-18.

Sleepypod Atom is a modern pet carrier for everyday living that is consistent with the innovative design features for which Sleepypod has built its reputation. In designing Sleepypod Atom, Sleepypod took ideas from its multiple award-winning Sleepypod Air and applied them to the smaller-sized Sleepypod Atom.

“Sleepypod Atom’s size allows for optimum comfort when carrying it around town or wherever you may be traveling,” says Michael Leung, one of Sleepypod’s co-owners and product designers. “Its thoughtful features and its durability set it far apart from the competition.”

Ergonomic and sleek, Sleepypod Atom in its carrier function fits comfortably below a wide range of airline seats. For added versatility, seatbelt straps on two sides transform Sleepypod Atom into a safe car seat. Other significant features include a secure and durable mesh panel positioned on three sides for better ventilation, Ultra Plush bedding that is removable for easy cleaning, and top and side entries for easy access. In addition, Sleepypod Atom is designed to fold flat for easy storage. Its sturdy, easy-clean exterior is made of luggage-grade, ballistic nylon. An interior collar clip, large front zipper pocket plus two smaller end pockets for essential pet items, adjustable shoulder straps with comfort padding, a padded carry handle, and ergonomic zipper pulls are additional features.
